

Rubber spacer for DCF102

Particularly useful if you want to fit a DCF102 Magnetic Contact to a metal surface.

The SPA-RS spacer reduces the interference from the metal surface ensuring that you keep a good operating gap and avoid false alarms.

This spacer also helps fitting the contact in an awkward spot eg. uneven surfaces and is neat and easy to use.

Dimensions: 150mm x 40mm x 10mm

Material: Black rubber
